Mousetrap Car

LEVEL: Grades 9-10 and 11 - 12

TYPE OF CONTEST: Individual/Team

COMPOSITION OF TEAMS: 1 - 2 students per team

NUMBER OF TEAMS: 3 teams for 9th-10th; 3 for 11th-12th

SPONSOR: Vonna Hammerschmitt, Director, Chapman University

OVERVIEW: Students will design and build their own vehicle which must be solely powered by a standard mousetrap and will travel up a 30 degree incline. Participation logistics and limits and competition facilities may vary by host site. Advisors and students are responsible for verifying this information with their center director.

MATERIALS: One standard-sized mousetrap is required; All other materials to build the vehicle are legal and optional

RULES:

1. Students must design and build their own vehicle which must be solely powered by the mousetrap and activated by tripping the original mousetrap trip mechanism.
2. NO other energy source may be added. (e.g. CO₂ Cartridge, batteries, elastic strings, rubber bands, etc.
3. The standard mousetrap must be mounted to the chassis AND must NOT be painted or decorated.
4. Hardware may be added to the mousetrap, but the original hardware and mounting block may ONLY be altered to attach it to the vehicle. The mousetrap
may not be disassembled and then reassembled.
5. The springs on the mousetrap may NOT be cut, bent, over-wound, heat-treated or altered in any other manner.
6. No part of the vehicle may be attached to any part of the ramp.
7. Vehicle must roll or coast along the ramp. All wheels must stay in contact with
8. The ramp may not be modified.

**JUDGING:**

1. Vehicles will be checked for specifications and impounded prior to the performance event. Vehicles will be released for trials but will remain impounded between runs.
2. Vehicles must be in testing condition prior to check-in for vehicle performance. If vehicles are disqualified during specification check, design changes will not be allowed.
3. Each vehicle will be allowed 2 non-consecutive runs.
4. Repairs are only allowed with replacement parts and materials. All repairs must be done in the official repair area and vehicles must be ready when called for the next round.
5. Each vehicle must be ready for competition when called or forfeit that trial.
6. Each vehicle must be in a “ready, stationary, hands-off” position prior to the start order from the judge.
7. “Start” or “Ready Position”: vehicle resting forward of the “Start Block”
8. One team member will be responsible for launch and will indicate to the judge that the vehicle is in the ready position.
9. The team member must wait until the judge gives the “START” order. If the vehicle moves prior to this, a “False Start” will be declared by the judges.
10. Only one “False Start” will be allowed per run. Two “False Starts” during run attempt disqualifies that run.
11. Students may not touch or interfere with the vehicle once the lever has been tripped.
12. The order of competition will be randomly selected.

**AWARDS:**

1. Medals will be awarded for 1st, 2nd and 3rd place based on the greatest distance the vehicle travels up the ramp.
2. Ribbons will be awarded for Creativity and Engineering Design
3. Only teams placing in the distance category will advance to Regional MESA Day.

MOUSETRAP CAR
Guidelines to Use

☐ Standard-sized Mousetrap was used

☐ Mousetrap was the only energy source used

☐ Mousetrap has NOT been painted or decorated

☐ Mousetrap springs have not been modified in any way

☐ Car is activated by tripping the original mousetrap trip mechanism

☐ Mousetrap can be “set” and car can sit in a hands-off “ready mode”

• APPENDIX

Track Specifications and Recommended Equipment
1. 4’ X 8’ smooth, finish grade plywood, arranged and supported at a 30 degree angle, with a 1” X 3” piece of wood extending the width of the ramp to act as a “Start Block”. If possible a 4’ Ramp Extension may be used to allow teams to achieve maximum distance
2. Recommended Equipment & Supplies: 2 meter measuring tape (craft or sewing style); “Sign Here” post-its for temporary identification of stop locations.

Judging Guidelines

Measurements:
The distance that a vehicle travels will be measured from the front axle to the distance where the rear axle stops or leaves the designated track area, perpendicular to the starting block.
